Type: Document, Projection, Architectural Drawing

Subject: Structures, Dwellings, House, Guesthouse
Structures, Dwellings, House

Description: Plot plan, elevations, floor plans, sketches, foundation plan, roof framing plan, sections, electrical and lighting plan, plumbing fixtures

Roc's Comments:

Probably one of the best projects. Done for Lisa Heyward and Jock Crothers. Lisa's father was an architect and she knew exactly what she wanted and where. our job was to make it attractive and buildable. I think it worked. this house was built about 4 feet in front of a deteriorated home they first lived in. Once completed they tore the home down and built a small guest house in its place. The contractor foreman on this project was very divisive and made the construction phase difficult but we persevered and it came out well and very close to the budget. I think Lisa was disappointed in the debates we had with the contractors on the job trying to get them to keep to their original commitments. I wish I knew how to make the process less difficult for the client when this happens. Todd Stanley was an excellent help on this project and the guest house is really mostly his doing. He was a great member of our team.
